EDUCATION

St.Michael Matriculation Higher Secondary School

10th Standard - 9.3 2016 - 2017

Vaigai Matriculation Higher Secondary School

12th Standard & Group - Maths-Biology - 7.5 2018 - 2019

Rajalakshmi Engineering College

Bachelor of Engineering -Electronics and Communication Engineering - 8.58 2019 - 2023

LANGUAGE

Tamil: Superior

- Fluent in Tamil with excellent comprehension and communication skills
- Proficient in Tamil with ability to converse and write effectively

English: Advanced

- Exceptional English speaker with strong grammar, vocabulary, and pronunciation skills.
- Fluent in English, conveying complex ideas with clarity and precision.
- Excel in both personal and professional English settings as my second and professional language.

German: Novice

- Currently learning German as a beginner
- Project belongs to German country (BMW)
- Interacting with German in client communication
- Successfully obtained German A1 beginner certificate

SKILLS

- Improved expertise in Spring Boot, Spring MVC, and Spring Framework for efficient application development
- Streamlined business operations and enhanced customer engagement using Salesforce
- Developed and implemented robust SAP-ABAP programs for seamless integration
- Effectively managed and analyzed data using MySQL and PL/SQL databases
- Possesses in-depth knowledge of Java programming language for scalable application design
- Streamlined development processes using Maven and Linux
- Familiarized with Jira for project management and task prioritization
- Optimized coding efficiency using Eclipse IDE
- Utilized Git and GitHub for version control and collaboration
- Acquired basic knowledge of frontend development using HTML and CSS

PROFESSIONAL EXPERIENCE

COGNIZANT TECHNOLOGY SOLUTIONS

1. INTERNSHIP

OCT - 2023 - DEC - 2024

 - Transformed my internship at Cognizant Technology Solutions into a hands-on learning experience in the Standard Java Suite domain.
 - Designed and developed the 'Hospital Management System' project from scratch, leveraging Java for both frontend and backend development, and successfully completing it within the given timeframe.
 - Played a crucial role in enhancing patient care by implementing real-time patient monitoring and streamlining hospital operations, thereby contributing to the project's objective.
 - Conceived and integrated various modules for efficient patient management, ensuring seamless integration and effective communication between doctors and pharmacists.
 - Ensured the accuracy and timeliness of patient data monitoring through the project's real-time tracking capabilities, providing valuable insights for healthcare professionals.
2. PROGRAMMER ANALYST TRAINEE - DEVOPS ENGINEER

OCT - 2023 - DEC - 2024

 - Streamlined SCM platform migration from GitHub, revolutionizing version control processes with automation.
 - Effectively managed release activities for production environments, ensuring seamless and reliable deployments.
 - Fostered a collaborative environment by working closely with developers to identify and troubleshoot issues, ensuring smooth project delivery.
 - Designed and implemented Build and Release pipelines for Java applications using Gradle and Maven, automating CI/CD workflows and accelerating deployment.
3. PROGRAMMER ANALYST TRAINEE- BACKEND DEVELOPER

OCT - 2023 - DEC - 2024

 - Transformed backend solutions for the November release, delivering exceptional quality and meeting business requirements with precision.
 - Designed and developed robust backend code using Core Java and REST API, ensuring seamless integration with legacy projects.
 - Authored comprehensive project documentation, accurately capturing business requirements and updating Confluence with timely precision and clarity.

PROJECTS

- BMW- GCAP UK MAINTENANCE (Global Credit Assessment Platform)

2023 - 2024

 - Developed and implemented a comprehensive credit decision and rating process for retail credit business, serving as the core loan origination system for BMW Financial Services.
 - Processed customer applications for car leases and loans, utilizing creditworthiness assessments to provide automated approval decisions and ensured efficient and effective credit evaluation for non-standard applications through manual underwriting.
 - Designed and developed a front-end application, DFE, enabling dealers to enter customer details and integrate with external credit rating agencies for AML and AFM processing, thereby enhancing the credit assessment process.
 - Streamlined the credit assessment process through the implementation of sub-processes, resulting in enhanced overall efficiency and accuracy.

Platform Exposure

Salesforce Trailhead

- Completed modules on Visual Studio Code, Apex, and Lightning Web Components.
- Acquired knowledge and skills in Salesforce platform areas such as integration, database, CRM, security, and data management.
- Earned certification in Salesforce Shaolin.
- Achieved two super badges: Process Automation Specialist and Apex Specialist.
- Demonstrates expertise in Salesforce development, coding, automation, and customization, as well as proficiency in utilizing the platform for business solutions.

CERTIFICATE

- Demonstrated expertise in Salesforce technology through certification.
- Achieved A1-Beginner level proficiency in German through rigorous certification process.
- Acquired in-depth knowledge of SAP ABAP programming through certification.
- Developed intermediate skills in Prompting Techniques for Gen-AI, certified by industry experts.
- Completed comprehensive robotics training program, resulting in certification.
- Participated in one-month online internship in Internet of Things, gaining hands-on experience and certification.
- Earned two prestigious badges: Certified Generative AI Associate and Certified in GitHub Copilot, recognizing expertise in AI and coding tools.
- Completed comprehensive GitHub Copilot course and achieved certification, solidifying skills in AI-assisted coding.

RESPONSIBILITY

- Utilized work request monitoring to ensure timely project completion.
- Analyzed and resolved backend tester-reported issues within designated timeframes.
- Utilized log and database analysis to identify root causes of issues.
- Generated and distributed comprehensive analysis reports.
- Effectively managed concurrent activities and issues across multiple applications/projects.
